	Exercise 02
	Lumos
Turn-in directory : *ex02/*	
Files to turn in : `Makefile, *.c, *.h`	
Allowed functions : `avr/io.h, util/delay.h`	

- You must write a program that turns on LED D1 (PB0) when button SW1 (PD2) is pressed.

- When the button is released, the LED turns off.

- You must use only AVR registers (DDRX, PORTX, PINX).
